Educational Scenario

- Educational model that training students to recall information without in-depth understanding & prepare them for exams is widely failed.
- Graduates & post-graduates prepared from such models naturally lack optimum knowledge, skills, attitude & competencies.
- Obviously such graduates are not only non-employable but are also unable to handle day-to-day problems, difficulties & challenges. This is probably worst return on the money spend by the parents & government & time & physical energy invested by the students.

ADCP Philosophy of Education

- We believe that education is training of students to think & monitor their thinking process, ideas & thoughts. This will prepare them to deal effectively with various problems at professional as well as personal life.
- We believe in integrating powerful influence of formal education on workplace expertise & career advancement by emphasizing on transferrable skills. This will help students to realize that the kind of people they become, the sense of purpose they have, the income at their disposal & the social & economic contribution they make to the community.

Educational Approach at ADCP

- We have established clear, measurable, realistic & challenging learning goals considering 'gap' in between current curriculum outcomes & employment market needs.
- We have set clear, measurable & challenging assessments with performance criteria for generating evidence of achievement. This essentially consists of diverse formative assessments & feedback apart from summative assessments.
- We finally designed learning experiences and instructions that will facilitate students to achieve the desired results. We have adopted model that start from results, assessments & then teaching approach which ensures desired cognitive & psychomotor skills development of students.
- Learning process is made transparent by offering 'Course Description Booklet' & 'Learning Outcome Booklet' to the students.

Expert Human Resources

- To make this model functional at our end, we have appointed high-paid, well experienced & highly-trained team of faculty members.
- Faculty members are not only specialists in their subject area but also they are well-versed with requisite pedagogy, planning ability & are fully tuned to the specific learning needs of individual student.

Infrastructure, Facilities & Services

- To make our educational platform vastly compatible to this widely accepted & effective model, we have developed broad base of ultra-modern infrastructure, facilities & services.
